

# SERVICES AND COSTS OF GOOGLE MAPS PLATFORM

# GOOGLE MAPS PLATFORM

With **Google Maps, Places, and Routes**, Google Maps Platform provides the ideal basis for custom map applications. Each of these Google Maps products includes a set of **APIs and SDKs** with **200 USD free monthly usage**. If usage exceeds this free credit, customers are charged based on their consumption.

There are two options for customers to use Google Maps Platform: in online self-service or through a Google Partner. For self-service, you are billed in dollars via credit card. With **Ubilabs as a certified Google Premier Partner**, you not only benefit from our many years of expertise, but also **gain access to high-volume pricing discounts**.

## APIs and SDKs for Google Maps

Google Maps – the basis for static and interactive map applications

Maps API for Android

Maps SDK for iOS

Static Maps API

Street View API

Maps JavaScript API

## APIs for routes

Google Routes – for the best way to get from A to B

Directions API

Distance Matrix API

Road API

## APIs and SDKs for locations

Google Places – detailed information on more than 100 million locations

# YOUR PARTNER – YOUR ADVANTAGES

## DISCOUNTS AND SERVICES

As the leading **Google Cloud Premier Partner** in the DACH region, we offer Google Cloud and Google Maps from a single source. We advise you on the **implementation and migration** of Google Maps APIs and support you in **optimizing your usage**. You'll benefit from our **expertise in developing custom map applications** for companies from a wide range of industries.

### INDIVIDUAL PRICING

As a Google Cloud Premier Partner, we can offer you individual price packages and high-volume pricing discounts.

### FULL COST CONTROL

We will help you to develop a set-up that will enable you to control costs and optimize rights management. Our usage analyses support you in controlling and optimizing costs.

### FLEXIBLE BILLING OPTIONS

For corporations, we offer framework agreements with invoicing to individual departments or subsidiaries. With us, usage is invoiced in euros, while online self-service is billed in dollars via credit card.

### CERTIFIED SUPPORT

We help implement and utilize the Google Maps Platform in the best way possible. We're fast and reliable – in both German and English.

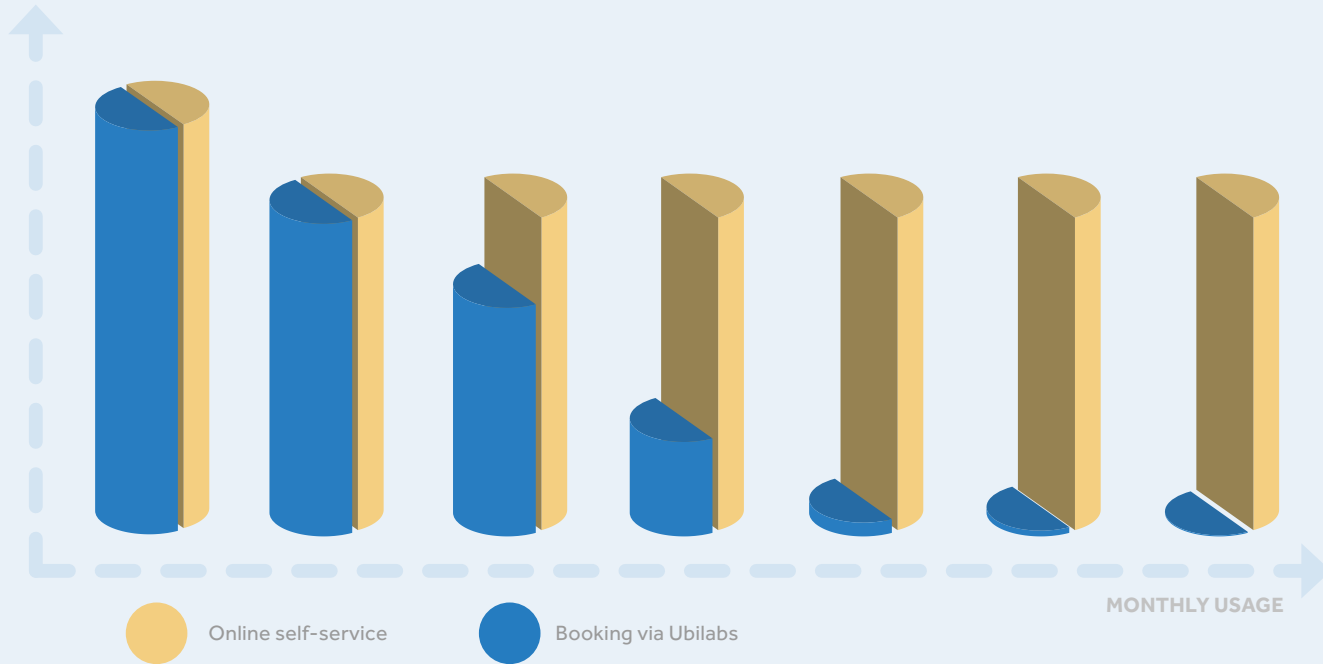

### PAYMENT BY INVOICE

With us, you pay upon receipt of an invoice. This means that you don't have to provide credit card details in your billing account.

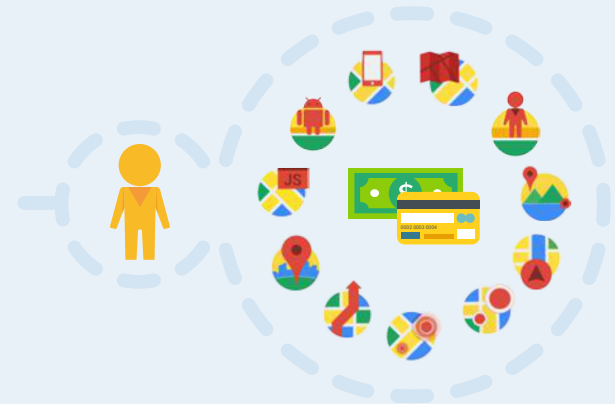

# GOOGLE MAPS PLATFORM – PRICING

## PRICING FOR MAPS, ROUTES, AND PLACES

PRICE PER API REQUEST

All Google Maps APIs and SDKs as well as all Google Cloud Platform services are available through a single billing account. Google Maps services are billed based on usage with a free **monthly credit of 200 USD**. In the [Google Cloud Platform Console](#), you can get an overview of your current API usage.

Self-service contracts receive access to two consecutive pricing tiers. After that, the price per API request remains static. With us, **you gain access to discounts via further pricing tiers.**
