

WORKSHOPS GOOGLE CLOUD & DATA ANALYTICS

3 DEPLOY

DEVELOPMENT & IMPLEMENTATION - DATA

You want to acquire technical knowledge about data warehouse and migration, work with real-time data and create company-wide access to data with the help of Looker?

The practice-oriented Deploy workshops focus on the most important technical issues related to the successful use of data.

Data Warehouse Modernization Training

Various migration concepts as well as the set-up of a data warehouse (BigQuery) are covered - always based on best practices and with a high practical content tailored to your application.

Target Groups:

Data Analysts, Data Engineers, Data Scientists, DevOps

Streaming Data Analytics Training

Hands-on training that covers collection, storage, processing and visualization of real-time data over the entire data lifecycle.

Target Groups:

Data Analysts, Data Engineers, Data Scientists, DevOps

Looker Basics Training

Workshop on setting up Looker and training focused on making the best possible use of it in order to successfully implement a data-driven approach to work throughout your organization - including an introduction to LookML and best practices.

Target Groups:

Data Analysts, Data Engineers, Data Scientists, DevOps, Specialist Fields
